Bring us your thermoelectric problem. We'll solve it. Marlow is the solution leader in thermoelectric cooling modules and systems. From industry-leading R&D to the best customer support, we consistently out-perform the others.

Every product has the whole Marlow Team standing behind it: years of advanced R&D, the industry's highest materials standards, cost-effective manufacturing, total account management and unmatched engineering

Our Commercial Cooling business team is focused on you – the customer. We build solution partnerships, focusing our efforts on pushing the performance envelope while maintaining our unbeatable reliability and quality. It's why we're the only thermoelectric company to win the Malcolm Baldrige National Quality Award. You'll work with an experienced engineering team that includes specialists in medical, industrial and consumer cooling. Engineering services include design support, project management and training support. We'll analyze your

support. Marlow designs customized solutions that deliver the highest value and the most reliable thermoelectric solutions. Our process management and advanced automation systems result in flexibility and rapid response capacity. Marlow's thermoelectric coolers and assemblies are used in the following commercial applications: DNA Cyclers, Diagnostic Medical Equipment, Hot/Cold Therapy Pads, Water Chillers, 3-D Imaging Systems for Dental Applications, Machining Tools, Laser

temperature control challenge, determine the thermoelectric solutions, and make recommendations on the systems, assemblies and manufacturing processes that will deliver the performance you need. We've got your solution.

APPLICATIONS	• Temperature Cycling of DNA Samples	• Industrial Enclosure Cooling
	• Sample Preparation/DNA Sequencing	• Semiconductor Processing & Test Equipment Cooling
	• Therapy Pads & Water Chilling	• Computer/IC Cooling
	• New Pharmaceutical Compound Processing	• Specialized Cooling Applications

Illuminators, Food Preparation, Blood Analyzers, Surgical Instruments, Scientific/Analytical Equipment, Portable Food/Beverage Containers, Wine Cabinets, Refrigerators and Cooling Computer Chips. Start your solution today. [www.marlow.com](http://www.marlow.com).
